Quick-Reference Icons Used In This Catalog

A series of handy, quick-reference icons runs down the center of nearly every product page in this catalog. These icons allow you to determine the major features of a particular Peterson product at a glance and compare similar products to determine which one is right for you.

Product is designed, engineered, and assembled in the United States of America.

LED product is multi-volt compatible for use with both 12 & 24-volt systems.

Indicates that a light has integrated retro-reflector functionality that meets applicable legal requirements.

One or more versions of this product are available with a quick-mount magnetic base.

Denotes clearance / marker lights that are PC rated. For additional information on the PC rating, see page 82.

Denotes lighting products that are submersible and suitable for installation on boat trailers..

Dimensional illustrations and schematics shown in this catalog are intended to provide general marketing information only. Details and measurements may be approximate, and should not be relied on for engineering purposes.

Non-Peterson trade names appearing in this catalog are used for descriptive purposes only. Peterson acknowledges that these trademarks remain the property of their respective owners.

426 Sealed 4" Round Long-Life Stop/Turn/Tail Light

- Long-life krypton, dual-filament, 2.1 / .59 amp, 32/3 cp, bulb.
- Requires mounting grommet and 3-wire plug for installation.
- Can be flange-mounted using 424-09 black snap-on flange on page 50.
- Kits include light, grommet, and plug.
- Viz-Pack versions have gray housing.
- See matching 426A turn signal on page 13.
- See matching 415 back-up light on page 29.
- For an LED alternative, consider Peterson 826 series.

side marker repl. lens	56-15R 10
stop & tail repl. lens	440-15 10

STOP TURN & TAIL LIGHTS

456 Over 80" Wide Submersible Combination Tail Light

- "-3P" versions are terminated with an industry-standard PL3 plug.
- "L" suffix indicates left (roadside) position.
- All 456-series lights have the following functions: stop, turn, tail, rear clearance, rear reflex, side marker, side reflex, and license light.
- Available in manufacturer's pack or visual pack.
- For an LED alternative, consider Peterson 856 series.
- Grounds through separate lead wire.
- Housing slides out for easy maintenance and bulb replacement while maintaining gasket seal.
- Low-profile, over 80" submersible combination tail light.
- Mounts on slide-on 2" centers and includes mounting hardware.
- Recommended for marine trailer use.

FENDER & CAB MARKER

154A-R

Clearance/Side Marker Light

- Features two 15,000-hour-rated, long-life bulbs.
- Functions as both amber front clearance light and red rear clearance light for over 80" applications.
- Mounting bracket and electrical connector are required to complete installation; 154 series has male pins.
- Mounting screw serves as ground when mounted to metallic surface with single lead wire for electrical connection.
- Mounts on top or side of most fenders to mark widest point on trailer; ideal for boat, cargo or horse trailers.
- Utilizes same mounting hardware as standard 154 series; see mounting accessories section for additional mounting options.
- For an LED alternative, consider Peterson 161A-R.

Class Intended Function Intensity

1	Emergency Response	Brightest
2	Warning	Brighter
3	Identification	Bright

Above as defined by SAE Standards

SAE J845 Class 2A

SAE J845 Class 2A refers to a specific classification of warning lights, particularly for omnidirectional or 360-degree warning devices used on vehicles. Class 2 lights, including those meeting Class 2A, are designed for applications where a medium range of warning is needed, such as for utility vehicles or roadside work. This class has a minimum light intensity approximately 2.5 times that of Class 3, and lower than Class 1.

MOUNTING ACCESSORIES

REPLACEMENT LENSES/GROMMETS

6110

Grommet Assortment

- 15 pieces.
- Assorted sizes and styles.

5600, 5601, 5602

5603

5600

Timer Box Switch

- Pre-programmed for 30, 60, or 90 minutes of ON time per button push.
- 5600 and 5603 versions can be programmed for up to 2 hours of constant ON time by pressing the button up to 4 times (30 min added per push).
- Additional time can be added at any time, up to maximum.
- Lights flash per button push to indicate that command is received.
- Pushing and holding button turns off lights at any time.
- "2 minute warning" slowly dims and raises light level prior to shut-off.
- 9-32 volt operating range.
- 10 amp maximum load. Must be used in conjunction with 10 amp fuse for circuit protection.
- Certified to meet IP68 ingress protection rating for installation inside or outside of vehicle.
- 5603 has 90" leads w/ individual bullet plugs rather than unified connector.

GROMMET MOUNTING DIMENSIONS

Dimensions for our most popular grommets are provided for general reference only. Due to various panel thickness, the size of the hole may need to be adjusted.

Grommet No.	Description	Hole Size	Max. Panel Thickness
127-18	Grommet, rectangle, flush mount, black	3.50" x 2.40"	0.16"
127-181	Grommet, rectangle, flush mount, white	3.50" x 2.40"	0.16"
142-17	Grommet, round, raised mount	2.75" diameter	0.18"
142-18	Grommet, round, recess mount	3.125" diameter	0.18"
142-181	Grommet, round, recess mount	3.125" diameter	0.18"
143-17	Grommet, round, flush mount, closed-back	3.125" diameter	0.15"
143-18	Grommet, round, flush mount	2.75" diameter	0.25"
144-18	Grommet, round, flush mount, closed-back	2.75" diameter	0.075"
146-18	Grommet, round, flush mount	2.25" diameter	0.25"
146-181	Grommet, round, raised mount	2.125" diameter	0.25"
146-182	Grommet, round, flush mount, closed-back	2.25" diameter	0.25"
146-184	Grommet, round, raised mount	2.25" diameter	0.17"
150-18	Grommet, rectangle, flush mount	2.88" x 1.53"	0.25"
150-181	Grommet, rectangle, flush mount	3.00" x 1.65"	0.25"
421-18	Grommet, oval, flush mount	2.50" x 6.75" 1.25" r. corners	0.0179–0.25"
426-18	Grommet, round, flush mount	4.50" diameter	0.25"
450-18	Grommet, rectangular, flush mount	5.43" x 3.58"	0.23"

RECOMMENDED WIRE GAUGES

American Wire Gauge (AWG) is the standard measurement of wire sizes in the US. The higher the gauge number, the thinner the conductor.

Heavier gauge wire is required as either amperage or wire length increases. Overloaded wiring can negatively affect reliability and safety due to excessive voltage drop and heat. Wires thinner than 18 AWG are not recommended for vehicular use.

The tables below provide general guidelines for choosing wire. Remember that common ground wires must be adequate to carry the total amperage on the circuit, even if separate hot wires are used.

The data included here only illustrates general wiring principles. Variables such as the exact type of wiring used and the type of devices connected will effect the actual performance of any circuit. Always verify proper operation after installation.

Wire Gauge Specification

Gauge (AWG)	Diameter (inch)	Diameter (mm)	Cross Section (mm ²)
0000	0.46	11.68	107.16
000	0.4096	10.40	84.97
00	0.3648	9.27	67.40
0	0.3249	8.25	53.46
1	0.2893	7.35	42.39
2	0.2576	6.54	33.61
3	0.2294	5.83	26.65
4	0.2043	5.19	21.14
5	0.1819	4.62	16.76
6	0.162	4.11	13.29

SAE PC RATING EXPLAINED

IMPORTANT NOTE: Every lamp, reflex reflector, and conspicuity treatment must be permanently attached in the location specified below and must comply with all applicable requirements prescribed for it by FMVSS/CMVSS 108. The face of any device on the front/rear and sides should be, respectively perpendicular and parallel to the vehicle's centerline, unless it is photometrically certified at installation angle. No part of the vehicle shall prevent any device from meeting its prescribed requirements unless an auxiliary device meeting all prescribed requirements is installed.

IN CANADA: Manufacturers and importers of vehicles must have the proper certification test records demonstrating compliance of lighting components with all prescribed requirements.

BASIC EQUIPMENT REQUIRED ON ALL TRUCKS, BUSES & MPVS

DESCRIPTION				MANDATORY REQUIREMENTS			
Area	Equipment	SAE Lens Coding	Functional Purpose	Quantity	Color	Location	Height mm(in.) from the ground
1	Headlamps - Lower Beam US requires "DOT" lettering on lens US & Canada - light source code required on lens	(H, HR)	Forward road illumination	Minimum 2	White	On the front - symmetrical as far apart as practicable If 4 lamp system - outboard or above upper beams	560-1370 (22-54)
	Headlamps - Upper Beam US requires "DOT" lettering on lens US & Canada - light source code required on lens	(H, HR)	Forward road illumination	Minimum 2	White	On the front - symmetrical If 4 lamp system - inboard or below lower beams	560-1370 (22-54)
	Parking Lamps Vehicles less than 2032mm wide	(P)	Indicate parked vehicle	Minimum 2	White or Yellow	On the front - symmetrical as far apart as practicable	380-1530 (15-60)
	Daytime Running Lamps (DRL) Canada - required / US - option US requires "DRL" lettering on lens if not headlamp	(Y2)	Indicate in use vehicle	Minimum 2	White or Yellow	On the front - symmetrical as far apart as practicable	380 (15) min. Max. depends on type of DRL
	Front Turn Signal/ Hazard Warning Lamps	(I)	Indicate direction of turn/ identify disabled vehicle	Minimum 2	Yellow	On the front - symmetrical as far apart as practicable	380-2110 (15-83)
2	Front Clearance Lamps Vehicles 2032mm wide or wider *photometrically certified at installation angle	(P2, PC* or P3, PC2*)	Show vehicle's width	Minimum 2	Yellow	At widest point - symmetrical on the front or near the front facing forward	As high as practicable
3	Front Identification Lamps (ID) Vehicles 2032mm wide or wider	(P2 or P3)	Indicate presence of a wide vehicle	Exactly 3	Yellow	On the front - center horizontally spaced 150 mm (6 in.) to 300 mm (12 in.) apart	As high as practicable or on top of the cab
4	a Front Side Marker Lamps *photometrically certified at installation angle	(P2, PC* P3, PC2*)	Front and rear side marker lamps / side reflex reflector indicate vehicle's presence and length	Minimum 2	Yellow	Each side at front as far forward as practicable	380 (15) minimum
	b Front Side Reflex Reflectors	(A)		Minimum 2	Yellow	At front - symmetrical as far forward as practicable facing sideward	380-1530 (15-60)
5	a Rear Side Marker Lamps ** *photometrically certified at installation angle	(P2, PC* or P3, PC2*)		Minimum 2	Red	Each side at rear as far back as practicable	380 (15) minimum
	b Rear Side Reflex Reflectors ** **not required on Truck Tractors	(A)		Minimum 2	Red	Each side at rear as far back as practicable facing sideward	380-1530 (15-60)
6	Rear Clearance Lamps Vehicles 2032mm wide or wider Not required on Truck Tractors *photometrically certified at installation angle	(P2, PC* or P3, PC2*)	Show vehicle's width MAY NOT be combined with tail lamps	Minimum 2	Red	At widest point - symmetrical on the rear or near the rear facing rearward	As high as practicable may be lower only if rear ID lamps are at the top
7	Rear Identification (ID) Lamps Vehicles 2032mm wide or wider Not required on Truck Tractors	(P2 or P3)	Indicate presence of a wide vehicle	Exactly 3	Red	On the rear - center horizontally spaced 150mm (6 in.) to 300mm (12 in.) apart facing rearward	In Canada: at the top - lower if door header narrower than 25mm In USA: as high as practicable
8	Tail Lamps	(T)	Indicate vehicle's presence and width	Minimum 2	Red	On the rear - symmetrical as far apart as practicable	380-1830 (15-72)
	Stop Lamps	(S)	Indicate braking	Minimum 2	Red	On the rear - symmetrical as far apart as practicable	380-1830 (15-72)
	Rear Turn Signal/ Hazard Warning Lamps	(I)	Indicate direction of turn/ identify disabled vehicle	Minimum 2	Red or yellow	On the rear - symmetrical as far apart as practicable	380-2110 (15-83)
	Rear Reflex Reflectors	(A)	Show vehicle's presence and width	Minimum 2	Red	On the rear - symmetrical as far apart as practicable	380-1530 (15-60)
9	Backup Lamp	(R)	Illuminates ground behind the vehicle and alert road users	Minimum 1	White	Rear	No requirement
10	License Plate Lamp(s)	(L)	Illuminates license plate	Minimum 1	White	On the rear - above or at the sides of license plate	No requirement
11	Center High Mounted Stop Lamp Vehicles less than 2032mm wide and 4536kg	(U3)	Indicates braking	1	Red	On the rear - centerline of the vehicle	860 (34) minimum

ADDITIONAL EQUIPMENT FOR SPECIFIC VEHICLES

VEHICLES 9.1m (30 ft.) LONG OR LONGER

DESCRIPTION				MANDATORY REQUIREMENTS			
Area	Equipment	SAE Lens Coding	Functional Purpose	Quantity	Color	Location	Height mm(in.) from the ground
12	a Intermediate Side Marker Lamps	(P2 or P3)	Indicate presence of a long vehicle	Minimum 2	Yellow	Each side near center	380 (15) minimum
	b Intermediate Side Reflex Reflectors	(A)	Indicate presence of a long vehicle	Minimum 2	Yellow	Each side near center facing sideward	380-1530 (15-60)

Truck Tractors

DESCRIPTION		MANDATORY REQUIREMENTS					
Area	Conspicuity Treatment	DOT Coding	Quantity	Color	Location	Height	Options
13	Rear Upper Body Markings	DOT-C DOT-C2	Exactly 2 pairs of 300mm long strips	White	Rear upper corners of cab facing rearward	As high as practicable excluding fairings	
14	Rear Marking	DOT-C3 DOT-C4	Exactly 2 sections of min. 600mm each	Red/White	Rear - facing rearward - on fenders, on mud flap brackets, or within 300mm below the top of mud flaps	As horizontal as practicable and not higher than 1525mm from the ground	If mud flaps not used - on the cab or frame mounted brackets

IMPORTANT NOTE: Every lamp, reflex reflector, and conspicuity treatment must be permanently attached in the location specified below and must comply with all applicable requirements prescribed for it by FMVSS/CMVSS 108. The face of any device on the front/rear and sides should be, respectively perpendicular and parallel to the vehicle's centerline, unless it is photometrically certified at installation angle. No part of the vehicle shall prevent any device from meeting its prescribed requirements unless an auxiliary device meeting all prescribed requirements is installed.

IN CANADA: Manufacturers and importers of vehicles must have the proper certification test records demonstrating compliance of lighting components with all prescribed requirements.

BASIC EQUIPMENT REQUIRED ON ALL TRAILERS

DESCRIPTION				MANDATORY REQUIREMENTS			
Area	Equipment	SAE Lens Coding	Functional Purpose	Quantity	Color	Location	Height mm(in.) from the ground
1	Tail Lamps	(T)	Indicate vehicle's presence and width	Minimum 2	Red	On the rear - symmetrical as far apart as practicable	380-1830 (15-72)
	Stop Lamps	(S)	Indicate braking	Minimum 2	Red	On the rear - symmetrical as far apart as practicable	380-1830 (15-72)
	Rear Turn Signal Lamps	(I)	Indicate direction of turn	Minimum 2	Red or Yellow	On the rear - symmetrical as far apart as practicable	380-2110 (15-83)
	Rear Reflex Reflectors	(A)	Indicate vehicle's presence and width	Minimum 2	Red	On the rear - symmetrical as far apart as practicable facing rearward	380-1530 (15-60)
2	License Plate Lamp(s)	(L)	Illuminates license plate	Minimum 1	White	On the rear - above or at the sides of license plate	No requirement
3	Rear Side Marker Lamps *photometrically certified at installation angle	(P2, PC* or P3, PC2*)	Front and rear side marker lamps / side reflex reflectors indicate vehicle's presence and length	Minimum 2	Red	Each side at rear as far back as practicable under 2032mm (80") wide	380-1530 (15-60) no max. for veh.
	Rear Side Reflex Reflectors	(A)		Minimum 2	Red	Each side at rear as far back as practicable	380-1530 (15-60) facing sideward
4	a) Front Side Marker Lamps *photometrically certified at installation angle	(P2, PC* or P3, PC2*)		Minimum 2	Yellow	Each side at front as far forward as practicable	380 (15) minimum
	b) Front Side Reflex Reflectors	(A)		Minimum 2	Yellow	Each side at front as far forward as practicable facing sideward	380-1530 (15-60)

† not required on trailers shorter than 6 feet in length

ADDITIONAL EQUIPMENT FOR TRAILERS EXCEEDING THE FOLLOWING PARAMETERS

Length 9.1m (30 ft.) or longer

DESCRIPTION				MANDATORY REQUIREMENTS			
Area	Equipment	SAE Lens Coding	Functional Purpose	Quantity	Color	Location	Height mm(in.) from the ground
5	a) Intermediate Side Marker Lamps	(P2 or P3)	Indicate presence of a long vehicle	Minimum 2	Yellow	Each side near center facing sideward	380 (15) minimum
	b) Intermediate Side Reflex Reflectors	(A)	Indicate presence of a long vehicle	Minimum 2	Yellow	Each side near center facing sideward	380-1530 (15-60)

Width 2032mm (80 in.) or wider

DESCRIPTION			MANDATORY REQUIREMENTS				
Area	Equipment	SAE Lens Coding	Functional Purpose	Quantity	Color	Location	Height
6	Rear Clearance Lamps *photometrically certified at installation angle	(P2, PC* or P3, PC2*)	Show vehicle's width MAY NOT be combined with tail lamps	Minimum 2	Red	At widest point - symmetrical on the rear or near the rear facing rearward	As high as practicable may be lower only if ID lamps are at the top
7	Rear Identification (ID) Lamps	(P2 or P3)	Indicate presence of a wide vehicle	Exactly 3	Red	On the rear - center horizontally spaced 150mm (6 in.) to 300mm (12 in.) apart facing rearward	In Canada: at the top - may be lower if door header narrower than 25mm In USA: as high as practicable
8	Front Clearance Lamps *photometrically certified at installation angle	(P2, PC* or P3, PC2*)	Show vehicle's width	Minimum 2	Yellow	At widest point - symmetrical on the front or near the front facing forward	As high as practicable

Width 2032mm (80 in.) or wider **AND** GVWR 4536 kg (10,000 lb.) or more

DESCRIPTION		MANDATORY REQUIREMENTS					
Area	Conspicuity Treatment	DOT Coding	Quantity	Color	Location	Height	Options
9	Rear Upper Body Markings	DOT-C DOT-C2 DOT-C3 DOT-C4	Exactly 2 pairs of 300mm long strips	White	On the rear upper corners facing rearward	At the top	Reflex reflectors may not be required if they are replaced in their required location with conspicuity treatment.
10	Bumper Bar Marking		Continuous	Red/White	On the rear bumper bar's horizontal element full width - facing rearward	No requirement	
11	Rear Lower Body Marking		Continuous	Red/White (see options)	On the rear full width of the vehicle facing rearward	As horizontal as practicable and as close as practicable to the range of 375 to 1525mm from the ground	Optional in Canada: Rear lower body and side conspicuity treatment may also be solid white, solid yellow, or white and yellow.
12	Side Marking		(see location)	Red/White (see options)	Each side - facing sideward continuous, or evenly spaced over minimum of 50% of length starts and ends as close to the front and rear of the vehicle as practicable	As horizontal as practicable and as close as practicable to the range of 375 to 1525mm from the ground	

PETERSON® NORTH AMERICAN WARRANTY

VEHICLE CORROSION WARRANTY

Peterson® Defender® 10-Year Limited Corrosion Warranty

Harness components and approved LED lights manufactured by Peterson Manufacturing Company ("the manufacturer") and installed together as the Peterson® Defender® brand Harness and Lighting System are warranted to the original purchaser against corrosion damage caused by the failure of the light

or wiring harness for a period of ten (10) years from the date of shipment. This Limited Warranty is not transferable and applies only to the original installation of the product.

This warranty is subject to Conditions and Exclusions as noted below.

PetersonPATRIOT® 5-Year Limited Corrosion Warranty

Harness components and approved LED lights manufactured by Peterson Manufacturing Company ("the manufacturer") and installed together as the PetersonPATRIOT® brand Harness and Lighting System are warranted to the original purchaser against corrosion damage caused by the failure of the light

or wiring harness for a period of five (5) years from the date of shipment. This Limited Warranty is not transferable and applies only to the original installation of the product.

This warranty is subject to Conditions and Exclusions as noted below.

Maxi-Seal® 3-Year Limited Warranty

Maxi-Seal® brand harness components manufactured by Peterson Manufacturing Company ("the manufacturer"), when properly installed in a manufacturer-approved configuration, are warranted to the original purchaser against defects in material and/or workmanship for a period of three (3) years from the

date of shipment. This Limited Warranty is not transferable and applies only to the original installation of the product.

This warranty is subject to Conditions and Exclusions as noted below.

MATERIAL/WORKMANSHIP DEFECT WARRANTY

Limited Lifetime Warranty

LED lights and **harness components** manufactured by Peterson Manufacturing Company ("the manufacturer"), except as noted below, are warranted to the original purchaser against defects in material and/or workmanship for the life of the product.

This Limited Lifetime Warranty is not transferable and applies only to the original installation of the product for as long as the original consumer owns the vehicle (lifetime).

This warranty is subject to Conditions and Exclusions as noted below.

LED 3-Year Limited Warranty

LED lights manufactured by Peterson Manufacturing Company ("the manufacturer") that are listed herein are warranted to the original purchaser against defects in material and/or workmanship for a period of three (3) years from the date of shipment:

- LED headlights

- LED snowplow lights
- Non-Lumen X LED strobe beacons
- 215 Series clearance/marker lights
- Tunnel Lights™

This warranty is subject to Conditions and Exclusions as noted below.

One-Year Limited Warranty

Incandescent, **halogen** and **xenon** lights and **related accessories** manufactured by Peterson Manufacturing Company ("the manufacturer") are warranted to the original purchaser against defects in material and/or workmanship for

one (1) year from the date of shipment.

This warranty is subject to Conditions and Exclusions as noted below.

CONDITIONS & EXCLUSIONS

Conditions

Warranty claims require examination of the unserviceable parts by the manufacturer or an expressly designated agent. Refund, acceptance, return, or exchange of unserviceable parts by other parties, including the manufacturer's dealers and/or resellers, does not constitute a determination on behalf of the manufacturer that such part is deemed warrantable.

This warranty allows only for repair or replacement of the defective part, or refund of the purchase price, at the sole discretion of the manufacturer. The

manufacturer makes no warranty regarding the fitness of its products for any particular purpose. The manufacturer is not liable for other incidental or consequential damages.

In no circumstances shall this warranty be extended to third parties except those performing as, or on behalf of, the manufacturer's authorized distributors.

Any implied warranties are limited to the specified warranty period.

Exclusions

Any of the above warranties shall be null and void if any one of or combination of these exclusions apply:

- Failure to install, operate, and maintain the product in accordance with the manufacturer's recommendations and standard industry practices.
- The product is damaged due to accident, abuse, misuse, improper installation, unauthorized modification, or exposure to incompatible cleaners or solvents.
- Product failure is caused by the defect or malfunction of equipment or components from a source other than the manufacturer.
- Product failure is caused by severe applications including (but not limited to)

buses, off-road, and construction vehicles.

- Product failure is caused by corrosive chemicals including acid washes and highway snow and ice chemicals.
 - Product failure is caused by connector failure and/or water penetration due to (but not limited to) cracked housing, cracked lens, wire wicking, or corrosion.
- This warranty gives you specific legal rights. You may also have other rights that vary by state and country. Some jurisdictions do not allow limitations on the duration of implied warranties. Therefore, some of the above limitations may not apply to you.

GET TO KNOW PETERSON MANUFACTURING

Industry-Leading Innovation So You Can Lead Your Fleet

Peterson has a proud legacy of industry innovations, from pioneering advanced corrosion-resistant lighting and harness systems to leading the way in open-source trailer telematics.

- First ISO 9001/QS-9000-certified U.S. lighting manufacturer
- First multi-function LED strobe and turn lights for the refuse industry
- First single-diode 4" LED round lights for intermodal chassis
- First to use insert-molding technology in trailer lighting and harness systems
- First guaranteed moisture corrosion-proof harness and lighting technology
- First open-source whole-trailer telematics with real-time fleet monitoring

Peterson Manufacturing is a family-owned company that has been operating, since 1945.

In 2025, we will be celebrating our 80th anniversary. From our 670,000 square-foot facility in the Heartland of America headquartered in Grandview, Missouri, we design, engineer, and manufacture wiring harnesses and lighting systems for commercial vehicles and trailers.

Our ability to vertically integrate our manufacturing processes enables us to offer high-quality custom solutions for our customers' most challenging needs, distinguishing us from our competitors.

Don Armacost, Sr.
Peterson CEO / Chairman, 1956–2000

BRIGHTER ROADS AHEAD

PETERSON

BRIGHTER ROADS AHEAD

We are illuminating the path forward with solutions that drive safety, inspire confidence, and empower our customers to go further.

At Peterson Manufacturing, we are dedicated to delivering innovative, high-quality vehicle safety lighting and harness solutions that meet the evolving needs of our customers. With a focus on quality, customer satisfaction, and customization, we strive to provide products that enhance safety and exceed expectations. By providing customized solutions tailored to each client's specific needs, we develop enduring partnerships that go beyond just product manufacturing. Our unwavering commitment to exceptional customer support ensures every interaction is defined by integrity, responsiveness, and a relentless pursuit of excellence. Together, we empower our clients to succeed, delivering products that consistently surpass both performance and safety standards on the road.

That passion for quality has always been at the heart of Peterson. It helped us grow from a small family business into a global, multi-industry, and multi-national corporation. It led us to become the first vehicle safety lighting manufacturer in the country to earn ISO 9001/QS-9000 registration. It drives our commitment to build products that don't just meet federal standards, but consistently exceed them by 25%. It's the reason we maintain one of the industry's lowest product return rates and a remarkable 98% order fill rate — and why we enjoy customer relationships that have lasted for generations.

You'll find those better ideas in every one of the more than 2,000 products in our line. Our mission is to deliver products of lasting value by continually improving quality, service, and cost-efficiency. It's what makes us the best in the business — and we look forward to proving it every time you choose Peterson.

OUR CORE VALUES

PRINCIPLED

We insist on high-quality products and ethical business practices.
We are answerable to our customers for our actions and outcomes. We uphold our core standards and values.

COLLABORATIVE

We recognize that we perform best when we work in concert with our business partners and within our industries.

DYNAMIC

We always prefer exploring new solutions rather than accepting pat answers. We are a force for progress in our industry. We have a positive attitude full of energy and new ideas.
